PROFESSIONAL SUMMARY

Data Analyst skilled in **SQL, Python, Power BI, and AI-assisted analytics**, with experience in data analysis and business intelligence. Proficient in **dashboard development, data validation, and customer behavior analysis**. Adept at transforming complex datasets into **actionable business insights**.

TECHNICAL SKILLS

Languages, Databases & Cloud | Python, SQL (MySQL, DuckDB), AWS (RDS)
Libraries & Tools| Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Excel, Git, GitHub
Data Modeling & BI| Power BI, DAX, Relational Data Modeling, Star Schema Design
Analytics | Statistical Analysis, Customer Segmentation, Customer Retention Analysis, KPI Development

WORK EXPERIENCE

Data Analyst Intern | Aug 2026 – Present
Trinetro Labs | Karnataka, India

- Validated **AI-assisted Natural Language-to-SQL outputs** against **MySQL datasets on AWS RDS**, checking table relationships, query logic, and analytical accuracy across different data scenarios.
- Investigated **Tally connector data extraction issues** by tracing **backend JSON/data flows** across varying company structures, using **Git, pull requests, and regression tests** to validate fixes and improve data reliability.
- Co-presented Trinetro Labs' startup pitch alongside the founder at the **Elevate Government funding event** in **Bengaluru**, presenting the **product, technology, and business model** to evaluators.

PROJECTS

Instacart Customer Analytics Dashboard | Python, SQL (DuckDB), Power BI | Jul 2026

- Analyzed **32.4M+ grocery line-item records across 206K+ customers** using DuckDB and SQL to investigate purchasing patterns, order frequency, basket size, and product reordering.
- Developed **18 analytical SQL queries and 10 reusable views**, using multi-table joins, aggregations, and window functions to build a four-factor customer loyalty score and analyze repeat-purchase behaviour.
- Identified grocery products with **85%+ reorder rates** using a minimum purchase-volume threshold and developed Power BI dashboards to communicate customer, product, and category-level trends.

Food Nutrition & Health Risk Analytics System | Python, SQL, Power BI | Jun 2026

- Developed a nutrition analytics system analyzing **1,028 food items** to identify nutrient-dense foods, high-risk products, and healthier dietary alternatives.
- Engineered **Nutrition Density** and **Health Risk Score** metrics and built an interactive Power BI dashboard for nutrition trends and food rankings.

EDUCATION

Bachelor of Engineering in Artificial Intelligence & Data Science | Bearys Institute of Technology, Mangalore
CGPA: 8.59/10 | **2023 – 2027**

Awards & Certifications

- **1st Place** — Smart India Hackathon Internal Hackathon at Bearys Institute of Technology.
- **National Hackathon** — Placed **9th** among **40 finalist teams**, selected from **273 competing teams**.
- **2nd Prize** — AI Sparkathon 2025, Bearys Institute of Technology.
- **Certifications:** Supervised Machine Learning (DeepLearning.AI) | SQL for Data Science (IBM/Coursera)
