Abdul Samhoon

Data Analyst | AI-Enabled Analytics & Business Intelligence
+91 9632459416 | bdlsmhn@gmail.com | LinkedIn | samhoon.xyz

TECHNICAL SKILLS

Languages, Databases & Cloud | Python, SQL, MySQL, DuckDB, AWS (RDS)
Libraries & Tools| Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Git, GitHub, Tally
BI & Visualization | Power BI, DAX, Power Query, Excel, Data Visualization, Dashboard Development
Data & Engineering | Data Modeling, ETL, Data Cleaning, Data Validation
Analytics | Statistical Analysis, Customer Segmentation, Retention Analysis, KPI Analysis, Trend Analysis

WORK EXPERIENCE

Data Analyst Intern | Aug 2026 – Present
Trinetro Labs | Karnataka, India

- Validated **AI-assisted Natural Language-to-SQL outputs** against **MySQL datasets on AWS RDS**, checking table relationships, query logic, and analytical accuracy across different data scenarios.
- Investigated **Tally connector data extraction issues** by tracing **backend JSON/data flows** across varying company structures, using **Git, pull requests, and regression tests** to validate fixes and improve data reliability.
- Co-presented Trinetro Labs' startup pitch alongside the founder at the Elevate Government funding event in Bengaluru, presenting the product, technology, and business model to evaluators.

PROJECTS

Instacart Customer Analytics Dashboard | Python, SQL (DuckDB), Power BI | Jul 2026

- Analyzed **32.4M+ grocery line-item records across 206K+ customers** using DuckDB and SQL to investigate purchasing patterns, order frequency, basket size, and product reordering.
- Developed 18 analytical SQL queries and 10 reusable views using multi-table joins, aggregations, and window functions to segment customers by loyalty and analyze repeat-purchase behavior.
- Identified grocery products with **85%+ reorder rates** using a minimum purchase-volume threshold and built **Power BI dashboards** to analyze customer, product, and category trends.

Tamil Nadu Air Quality Analysis | Python, SQL (DuckDB), Power BI | Oct 2026

- Analyzed 10,890 government air-quality observations across 8 cities and 31 monitoring stations to identify pollutant trends, spatial patterns, seasonal variations, and monitoring coverage.
- Built a Python/DuckDB pipeline for schema standardization, data cleaning, validation, and analytical SQL.
- Developed an interactive **Power BI dashboard** with dynamic pollutant analysis, monthly trends, city/station rankings, location-type comparisons, and monitoring insights.

EDUCATION

Bachelor of Engineering in Artificial Intelligence & Data Science | Bearys Institute of Technology, Mangalore
CGPA: 8.59/10 | **2023 – 2027**

Awards & Certifications

- **1st Place** — Smart India Hackathon Internal Hackathon at Bearys Institute of Technology.
- **National Hackathon** — Placed **9th** among **40 finalist teams**, selected from **273 competing teams**.
- **2nd Prize** — AI Sparkathon 2025, Bearys Institute of Technology.
- State-Level Innovator — AXIOM State Hackathon | Google Agentic AI Day | InUnity Community Innovation.
- **Certifications:** Supervised Machine Learning (DeepLearning.AI) | SQL for Data Science (IBM/Coursera)
